- Talk time: up to 10 hours

Highlights

Keypad lock
How convenient it is to take your DECT phone with you whilst gardening. But in your pocket it can be so jolted that a key might be accidently pressed. To prevent inadvertently calling your cousin in the US, the keypad lock is a safe way to avoid bad surprises on your next phone bill!

Paging key
Instead of looking in every corner of the house, simply call the handset from the base by pressing the dedicated key on the base station and the handset lets you know where it is hiding.

Instrumental ringtones
Instead of the traditional aggressive "buzzer" ringers, instrumental melodies are a more pleasant way to let you know when someone is calling.

Crystal Clear Sound Quality
The use of digital communication virtually eliminates interference, buzzing and hissing. It improves the intelligibility of messages left on the answering machine and even making it possible for users to record and reproduce music.

Phone-number display
The number of the person you want to call is displayed on the telephone display. You can verify it before seizing the telephone line.
